

Recommended PC Configuration for DeltaProof November 2021

1. Well recognized PC vendor (Dell, HP, etc)
2. **CPU:** Intel i7 (preferably 10th generation and up) or i9
3. **RAM:** 16GB RAM or more
4. **Hard Disk:** Main operating system drive: SDD – 512 GB or more, with PCIe v4.0 interface.
Secondary data storage: 1TB or more, SATA, 7200 RPM
5. **High performance graphic card** which can drive a 4K/8K resolution monitor at 60Hz
6. **Monitor** - high quality, large (at least 50”) 4K-UHD/8K monitor (a 50” 4K-UHD television capable of “Monitor mode” should be a good choice)
7. Ethernet port: 1/10Gbps
8. Enough USB ports (USB 3.2 is recommended).
9. **64-bit** Windows Operating System:
 - Windows 10 21H1:** Pro or Enterprise
 - Windows 11** : Pro or Enterprise
 - Windows Server 2016
 - Windows Server 2019
10. Wireless mouse and keyboard
